

ENCORE

Premium Water Filtration

The **Veo** treatment system is effective for dissolving and preventing scale, inhibiting corrosion, as well as reducing chlorine, chloramines, and chlorination by-products from your household water.

- Eliminates bad taste and smell associated with chlorine by-products.
- No salt, no chemicals, no on-going consumables.
- Eliminates scale buildup from hard water deposits and helps remove existing scale.
- The best, premium grade NSF certified medias.
- Five layer filtering leaves you with clean water, for peace of mind.

System Capacities

1 CuFt - 1,000,000 gallons lifetime capacity, up to 6 GPM, for a family of four. Life expectancy of the media is approximately 10 years.

1.5 CuFt - 1,500,000 gallons lifetime capacity, up to 8 GPM, for a family of six. Life expectancy of the media is approximately 10 years.

2 CuFt - 2,000,000 gallons lifetime capacity, up to 15 GPM, for a family of six. Life expectancy of the media is approximately 10 years.

Depends on water usage and water quality conditions. Not intended for microbiologically unsafe or unknown water quality. Disinfection may be required. This system is intended for treatment of municipal water, any other application requires a water quality analysis for best results.

***Lifetime Warranty**

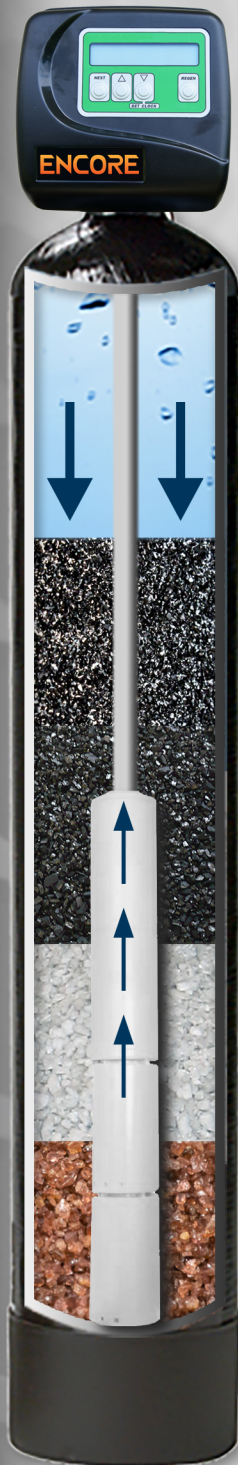

System Specifications

3/4" - 1.5" Inlet/Outlet sizes also available by request.

Tank Size	Weight	Height	Width	Depth	Inlet/Outlet
9" X 48"	75lbs	55"	9"	9"	1"
10" X 54"	100lbs	61"	10"	10"	1"
12" X 52"	125lbs	59"	12"	12"	1"

*Recommended PSI usage is 80 psi. Intended for residential use only. *Lifetime warranty excludes medias.*

Water The Way Nature Intended

The Veo utilizes the Clack metered control valve efficiently reducing waste water by 30% for reliable pure water.

5 Levels of Filtration For Pure, Pristine Water

Level 1: Granular Activated Carbon

This NSF Certified acid washed GAC removes chlorine, gases, heavy metals, odors, tastes, dyes, fuels, pollutants, disinfectants, pesticides, TTHM, sodium chloride, and volatile organic contaminants (VOC).

Level 2: Premium Catalytic Carbon

Premium, high activated carbon reduces remaining chlorine and chloramines, removing taste and odor, giving long lasting fresh water. This media filters a wide range of PH levels and adds a final polish to the filtered water.

Level 3: Filter-Ag Plus

All natural, environmentally friendly, Filter-Ag Plus has a large, micro-porous surface area that minimizes suspended contaminants and turbidity. Highly efficient filtering down to 5 microns.

Level 4: High Density Garnet Media

High hardness, high density filter media, effectively filters and provides a high quality support bed for this system.

Level 5: Greenguard AntiScale Chamber

Environmentally friendly way to control scale without salt. Transforms hardness minerals into crystal particles using template assisted crystallization (TAC) technology so hardness by-products are easily washed/wiped away.

The catalytic surface of the antiscala media pulls the calcium and magnesium ions into harmless "nano crystals" that are too small to bond and form scale. These nano crystals also help break the grid structure of existing calcium deposits, gradually removing existing scale build-up until it is completely removed.

Typically Sized As:

2-3 People - Evo 1 Cuft
750,000 Gallons

3-4 People - Evo 1.5 Cuft
1,000,000 Gallons

4-6 People - Evo 2 Cuft
1,500,000 Gallons
